

*ELECTRICAL SPECIFICATIONS:*

ACCUSOUND SILVER STUDIO PRO:

CAPACITANCE AT 1 KHz

Average Mutual Capacitance: 18.4 pf/ft

Average Conductor to Shield Capacitance: 33.0 pf/ft

Capacitance Unbalanced (Conductor to Shield): 1.3% Maximum

Characteristic Impedance at 1 MHz

Average Differential Mode: 76 Ohms

Capacitance was tested on a 4 pole guarded bridge circuit with measurements of each conductor to the other connected to the shield and both connectors together to the shield. Impedance was tested using a 75ohm differential matching transformer and an impedance bridge.
