**FURMAN SOUND ANNOUNCES THE LAUNCH OF THE REDESIGNED
FURMANSOUND.COM WORLD WIDE WEB PAGE**

January 16, 2003, NAMM, Anaheim, California - Furman Sound, Inc., NAMM booth #6990 HALL A, today announced the launch of the company's fully redesigned World Wide Web Page: <http://www.furmansound.com>. The extensive www.furmansound.com is a complete resource of detailed product and company information designed to suit the demands of the commercial/industrial sound professional to the fastidious home audiophile. www.furmansound.com is replete with detailed product features, specifications, press releases, a dealer and distributor locator, product pictures, and installation information.

Designed so anyone can quickly and easily find the right Furman Product for virtually any audio application, the intuitive and easy-to-navigate **www.furmansound.com** is continually updated with the latest, up-to-the-minute Furman Sound product information downloadable as pdf spec sheets. Additionally, www.furmansound.com is a complete company contact resource to expedite any and all sales and customer service issues. A nationwide dealer and international distributor locator quickly puts the customer in contact with Furman Sound sales and tech support personnel anywhere in the world.

“Furman Sound has developed a family of products that we believe dramatically improves the overall performance quality of any installed audio product and system,” states V.P. of Sales and Marketing, Joe Desmond. “Professional musicians and studio pros recognize Furman Sound professional audio equipment as second to none on stage and in the studio. Our consumer products represent a quantum leap forward in improving the overall performance of home entertainment systems. Systems integrators rely on Furman Sound power conditioners, regulators, and
