► EDITORIAL LEADERSHIP FOR THE GLOBAL PRO AUDIO COMMUNITY

While *Live Sound International* is getting ready to celebrate three decades as the leading journal for sound reinforcement and *ProSoundWeb.com* is coming up on 20 trailblazing years as professional audio's leading portal website, we're also going in new directions. Our social media presence, for example, continues to grow by leaps and bounds, and we've also launched a new podcast series for audio professionals that's been very well received.

Regardless of direction both long-standing and more recent, we continue to follow a very straightforward mantra that drives our editorial approach: all publications are written by pro audio practitioners for pro audio practitioners. Our deep editorial team is highlighted by a stable of long-time contributors who consistently bring informed editorial to the table on a daily basis. Together they bring a combined 200-plus years of practical pro audio working experience. Meanwhile, a steady stream of newer authors deliver fresh ideas and perspective, and it's all furthered with the valuable contributions and oversight of our veteran editorial advisory board.

Collectively, this select group shares a passion for education and for seeking new and innovative ways to communicate vital pro audio principles with our readership. The focus is on the latest technologies and applications as well as bedrock audio principles, upholding our firm commitment to deliver the most relevant information to our highly qualified readership around the world.

KEITH CLARK, *Editor in Chief*
269-687-8846 | kclark@prosoundweb.com

► #1 MEDIA FOR AUDIO PROFESSIONALS

Our Mission at Live Sound International and ProSoundWeb.com is the same today as the day we were founded. To help audio engineers and sound reinforcement professionals do their jobs better. After all, everyone in our market knows it is our job to make sure the show goes on with the highest quality audio possible! Whether it be a live performance or an audio system installation, our readers are professionals, the best in their field, and they strive to get consistently smarter and better at what they do through our media.

Unique content approach keep us as #1 with readers: Audio engineering and sound reinforcement by its very nature, gets more difficult as your venue gets more complicated.

That's why for 27 years, Live Sound International Magazine and Prosoundweb.com have delivered real world lessons filled with the experiences and expertise of the industry's best and brightest audio practitioners. We deliver over 200,000 engaged readers each month, the highest of any media brand and our readers are passionate about what we deliver.

Help you do your job better too: Our Media Partners want the same benefits from us as our readers do. They need help doing their jobs better and growing their businesses. We support them by producing custom programs, tailored to their individual goals using our Magazine, digital, social media, and events to produce sales leads, meet new customers, and build stronger brands. Live Sound International and Prosoundweb.com provide vendors engagement with the largest audience in the live event -sound reinforcement industry, which produces cost effective results.

KEVIN MCPHERSON, Executive Publisher, Pro Audio
508-663-1500 ext. 264 | kmcpherson@ehpub.com

► NEW FOR 2019

Social Audience Extension Program: We know everyone wants to harness social media as a channel to build your brand and find new customers. But it is hard to do in a cost effective manner. The team at Live Sound has created a new and exclusive audience extension program that targets known visitors to PSW, your customers, while they are on Facebook. If you want to reduce your marketing costs and increase your social media targeting efficiency then this is a must try program for you. See page 5 to learn more about this unique opportunity.

Custom Content Lead Generation: Let us create the content our readers want to engage with while you enjoy the leads and added revenue they bring. This is a simple program with outstanding results. See page 21 for more information.

Church Sound: One of the fastest growing opportunities in the live performance and installed markets is the House of Worship market. We have that covered with Church Sound magazine, Church Sound eNewsletter, and a dedicated web presence on ProSoundWeb.com. Ask us how we can target this segment for you with these channels and social media, too. (See page 13)

Featured Product eNewsletter: This customized newsletter is a must for anyone launching a new product in the professional audio market. Your message, sent to our audience, by our editors, creates a great value. Add to that our highest open rate and you have an incredibly successful program. See page 21 for more information.

Rule Your World: Microphone World, Loudspeaker World and Console World are exclusive sponsorships that tell the audio community who is the most important player in these industries. Limited to only one sponsor each, you will be on the home page of ProSoundWeb and own the content tagged with these technologies. This is a perfect blend of contextual positioning and dominance. If you want to be known as the leader in your field, this is it. See page 23 for more detail.

Video for Audio Pros: Video is a trending engagement media channel. Ask us how we can get your video exposed to the largest number of audio professionals, quickly and easily in a cost efficient way.

¹ AUGUST 2018 LSI/PSW READER SURVEY

PROSOUNDWEB.COM & LSI EDITORIAL TEAM

Keith Clark
Editor In Chief
kclark@prosoundweb.com

Keith has covered professional audio and systems contracting for more than 25 years, authoring hundreds of articles in addition to hands-on work in every facet of publishing. He fostered the content of ProSoundWeb (PSW) from its inception, helping build pro audio's largest portal website, and has also served for several years as editor in chief of LSI.

Michael Lawrence
Technical Editor
michael@precisionaudioservices.com

Michael has been involved in event production since the seventh grade, when he was frequently pulled from classes to run his school's sound console. He provides FOH mixing and sound system optimization for a number of clients. He is currently at work on a new book, "The Live Sound Companion: A Complete Guide to the World of Live Sound Reinforcement."

Craig Leerman
Senior Contributing Editor
cleerman@livesoundint.com

Craig has worked in pro audio for more than 25 years in a career that encompasses touring, theater, live broadcast events and even concerts at the White House. Currently he owns Tech Works, a production company based in Reno, NV that focuses on corporate events.

M. Erik Matlock
Senior Editor
ematlock@livesoundint.com

Erik has worked in a wide range of roles in pro audio for more than 20 years in a dynamic career that encompasses system design and engineering in the live, install and recording markets. He also spent several years as a production staff member and team leader for the largest non-denominational church in central Georgia.

Bruce Bartlett
Consulting Editor

Bruce has worked in pro audio for more than 30 years as a live sound and recording engineer, audio journalist, and microphone design engineer. A widely published author on pro audio topics, his latest books are Practical Recording Techniques 7th Edition and Recording Music On Location 2nd Edition.

PROSOUNDWEB.COM & LSI EDITORIAL BOARD

We've assembled a team with in-depth knowledge and practical working experience in professional audio to help guide the editorial focus and content of ProSoundWeb and *Live Sound International*. They also share a passion for education and for seeking new and innovative ways to communicate vital pro audio principles with our readership.

Pat Brown

Pat is a graduate of the University of Louisville with a degree in electrical engineering technology, with a background as a musician, sound technician, retail music store owner, contractor and consultant. For more than 25 years, Pat and his wife Brenda have owned and operated SynAudCon, recognized as an industry leader in audio education worldwide.

Mike Sokol

Mike has been involved with sound reinforcement for more than 50 years as a mix engineer and sound system designer. In addition, he's a noted audio instructor as well as the writer of hundreds of published articles on audio and electrical power. He also moderates the AC Power & Grounding Forum on ProSoundWeb.

James Stoffo

James has worked in pro audio for more than 25 years, and is noted as a wireless product designer in addition to his wireless and frequency coordination work with countless high-profile performances, events and venues such as the Super Bowl, Broadway theatre, World Cup, NBA All-Star Weekend, the Radio City Rockettes and many others.

Jim Yakabuski

Jim has spent more than 35 years as a live sound engineer, working with artists such as Van Halen, Journey, Avril Lavigne, Peter Dinklage, and many others. He's also the author of "Professional Sound Reinforcement Techniques," which provides a collection of tips and techniques for mix engineers.

Samantha Potter

Samantha's career in pro audio started in studio production, but quickly advanced into live sound reinforcement. Pedagogically passionate and an electronics enthusiast, she develops technology curriculum and re-designs house of worship media systems to help bring churches into the 21st century.

Dave Rat

Dave heads up Rat Sound Systems, a leading sound reinforcement company based in Southern California, and has also been a mix engineer for more than 25 years, working with artists such as Red Hot Chili Peppers, Soundgarden, Blink 182 and many others. In addition, he presents audio educational seminars and is a long-time contributor to LSI and PSW.

Mike Sessler

Mike has been involved in live production for well over 20 years both inside and outside of the church world. In addition to his work with PSW and LSI, he's a long-time church production operator and leader, is the author of the blog Church Tech Arts, and also hosts a popular weekly podcast called Church Tech Weekly.

Danny Abelson

Danny is an entertainment industry technologist with more than 35 years of experience in many facets of pro audio. A regular contributor to LSI and PSW, he is passionate about great audio and enjoys writing on the human and environmental factors in live sound.

Serving audio pros since 1992.

► THE LARGEST PRO SOUND AUDIENCE

► EXPAND YOUR REACH WITH OUR SOCIAL MEDIA AUDIENCE EXTENSION PROGRAM

ProSoundWeb's social media channels have more than 56K followers that are prequalified via visits to ProSoundWeb on a regular basis. You can reach this targeted audience of audio professionals through regular Facebook campaigns. Extend your message to these professionals by adding 2-week Facebook campaigns to your existing PSW advertising programs.

UTILIZE PROSOUNDWEB'S FACEBOOK CHANNEL TO REACH CUSTOM TARGETED AUDIENCES MADE UP OF PSW VISITORS.

► "APPLYING THE LAW OF DIMINISHING RETURNS" ENHANCES EFFICIENT MEDIA BUYING

According to the Law of Diminishing Returns in marketing, media programs are optimized when the largest audience is utilized with full frequency (12 issues of LSI and a 12-month program in PSW) before adding a second, less productive, smaller reach advertising vehicle.

The Law of Diminishing Returns

A great majority of the readers of five business-to-business magazines can actually be reached by advertising in just one or two of the leading magazines—reaching the readers at a fraction of the cost of using all five¹.

► REAL WORLD GEAR: MONTHLY PRODUCT EDITORIAL SECTION

Stand out in a crowded market *when it really matters*

Every month the editors of LSI/PSW highlight a product category that is vital to our reader's successes. A free basic listing is given to the major products in these categories. As a vendor in the category you can enhance your listing to show your product as one worthy of purchase consideration.

Real World Gear

Enhance your print product listing:

- Stand out with a half page 4-color editorial write up, including photographs, key specs, product information and a recent install
- Your product is guaranteed to grab the attention of our 23,050¹ Live Sound International subscribers
- Your product is exposed to an average of 207,798¹ ProSoundWeb users per month.
- Contact Jeff Turner for more information.

RWG Spotlight Listing

NEXO STM | yamahaproaudio.com

Reach Communications (Minneapolis) recently deployed a NEXO STM Series system in a 360-degree configuration to deliver coverage to more than 50,000 for the Pulse-Twin Cities worship event at U.S. Bank Stadium, a domed venue in downtown Minneapolis.

The system incorporated 15 STM M46/B112 main and bass module sets per side, with side arrays of another 15 STM M46/B112. The hangs also included dual STM M28 to provide down fill. Eight STM S118 subwoofers were flown per side, and on the ground there were a dozen RS18 subwoofers (running in cardioid mode) joined by eight STM S118s (omni) per side. All of the loudspeakers were driven by more than 60 NXAMP 4x4 amplifiers over (Audinate) Dante networking, with an analog backup.

"The STM system by far outperformed our expectations," states Val Gilbert, NEXO engineering support specialist who provided onsite support. "No one felt the system was running out of headroom, and the engineers were globally satisfied, with SPL reaching 120 dB(A) peak at front of house. Considering the extremely challenging acoustics of the venue, the overall sound was very good."

TECHNOLOGY FOCUS: STM modules are outfitted with proprietary Compossing and REDLock rigging that enables any size system to be flown safely by one person. All adjustments can be made from one position at the rear of the cluster.

OF NOTE: Both M46 Main and B112 Bass modules share the same dimensions, weight and gravity center, forming seamless arrays. The STM S118 extends LF response down to 25 Hz. The M28 Omni can also be arrayed in the same columns with the M46 in larger-format systems, arrayed in the same column as the B112 bass cabinets in mid-format systems, or used independently.

KEY SPECIFICATIONS:
Configuration: 3-way
B112 Bass LF: 1 x 12-in neo woofer, hybrid horn design
M28 Omni: 2 x 8-in neo woofers, 2 x neo compression drivers
M46 Main LF/MF: 4 x 6.5-in flat-membrane cones
M46 Main HF: 4 x 2.5-in neo drivers on Hyperbolic Reflector (4 x HRW waveguides)
Frequency Response: 35 Hz – 20 kHz (M46); 55 Hz – 20 kHz (B112)
Horizontal Dispersion: 90 or 120 degrees (M46)
Size (H x W x D) & Weight: 13.8 x 22.6 x 28.1 in; 130 lbs (M46 & B112)
Electronics: NUAR racks, incorporating NXAMP4x4 amplifiers/processors are outfitted with precisely matched presets for the STM Series

GOING BIG

Large-format line array design and a look at recent models.

by Live Sound Staff

Large-format line arrays deliver in terms of output, and in many cases, are now much more than simply loudspeakers, better described as integrated systems. The vast majority of the models we're presenting here incorporate dedicated power and DSP packages (onboard or rack mounted), and are outfitted with sophisticated control, networking, and optimization capabilities. Integral rigging is user-friendly and marked by precision and ease of use.

It's still surprising to some that line arrays have been around for more than half of a century in the guise of column loudspeakers, and most of them in earlier days were voice range only. Their application was generally for highly reverberant spaces, where a narrow vertical dispersion avoided exciting the reflective room boundaries and, as a result, improved intelligibility of the spoken word.

V-DOSC from L-Acoustics was the first (in the mid-1990s)

to show the concert sound world that more level and smoother frequency response can come from fewer drivers in a line array. Now, large-format line arrays (which we loosely identify as models with 12-inch and larger woofers) exist in a wide range of types and options.

Driver configuration and enclosure design remain defining factors. Some models employ dual woofers with a center high-frequency section to provide horizontal symmetry. The simplest systems may just have a single cone and high-frequency driver. Quasi 3-way solutions use dual woofers, but low-pass one woofer at a lower frequency than the other, thereby eliminating lobing at higher frequencies where the drivers become displaced with relation to the frequencies being reproduced.

True 3-way designs operate separate low-, mid- and high-frequency drivers, each in their own band. There are several approaches to horn-loading, which can provide higher sensitivity for additional power. And now, we're seeing some 4-way systems, with the mid-frequencies subdivided into two sections.

In the listings that follow, note that the horizontal dispersion spec is provided for all models. Vertical dispersion varies, dependent on array structure and configuration.

Also, several companies present more than one choice in this category, and for the most part, we've selected the largest and/or the most recently introduced model, with the other options referenced. In addition, several manufacturers also offer complementary array elements with wider angles of coverage that perform better as the lowest near-throat enclosure(s) in vertical arrays.

Enjoy this look at the latest large-format line arrays. **LSI**

Adamson Systems E15
adamsonsystems.com

Configuration: 3-way
LF: 2 x 15-in neo Kevlar woofers
MF: 2 x 7-in neo Kevlar cones
HF: 2 x 4-in neo voice coil neo Kevlar drivers
Note: MF/HF coaxially mounted on Co-Linear Drive Modules
Frequency Response: 60 Hz – 18 kHz
Horizontal Dispersion: 90 degrees
Size (H x W x D) & Weight: 15.4 x 51.4 x 21.4 in; 175 lbs
Electronics: E-Rack with Lab Gruppen PLM amplifiers, audio & AC panels, Ethernet switch
****Adamson also offers the E12 12-in line array**

L-Acoustics K1
l-acoustics.com

Configuration: 3-way
LF: 2 x 15-in woofers, bass-reflex
MF: 4 x 6.5-in cones
HF: 3 x 3-in drivers on DOSC waveguides
Frequency Response: 35 Hz – 20 kHz
Horizontal Dispersion: 90 degrees
Size/Weight: 17.2 x 52.8 x 20.5 in; 234 lbs
Electronics: LA-RAK with LAB amplified controllers, includes signal, network & power distro panels
****L-Acoustics also offers the K2 12-in line array**

d&b audiotechnik GSLB & GSL12
dбаudio.com

Configuration: 3-way
LF: 2 x 14-in woofers (front), 2 x 10-in cones (side)
MF/HF: Coaxial, 1 x 10-in cones and 3 x 1.4-in neo drivers on a dedicated wave shaping device
Frequency Response: 45 Hz – 18 kHz
Horizontal Dispersion: GSLB/GSL12 – 80 or 120 degrees
Size (H x W x D) & Weight: GSLB/GSL12 – 15.4 x 53.2 x 24.7 in; 171 lbs
Electronics: d&b D Series amplifiers/DSP/loudspeaker management, accessible via d&b Remote network

Exploring an important path to tech excellence

48%

OF THE LSI AUDIENCE IS INVOLVED IN THE HOUSE OF WORSHIP MARKET¹

Project Profiles

First Southern Baptist Church
Prott, KS

THE NEW SANCTUARY for this 800-member congregation has bypassed the ongoing shrinking of the LSI spectrum by integrating six channels of Audio-technica System 10 PRO rack-mount digital wireless systems operating in the 2.4 GHz range. Specifically the church is utilizing four handheld

transmitters, as well as two body packs working with exact microphones, for music and spoken word applications.

Advanced Sound & Communication (Knox, MO), which provided much of the new system, first tried working with the new system package. "The previous console performed an on-site scan. The system's wireless systems was not required by the manufacturer, and the frequency was recommended for Prott, Kansas," says Brent Kandy of Advanced Sound.

also noting how the area's signal take up much of the LSI spectrum. "We did research and scanning for a while, but not enough LSI frequencies to use."

The situation changed when Kandy visited Randy's office and saw the 10 PRO. "It worked," he says, "well that I didn't have to have antennas out of the church and into the stage, they're actually in the counter by the front of house. I take those mics outside the building, work, and just in time, really."

FULL PAGE ADVERTISERS RECEIVE A 1/2 PAGE PROJECT PROFILE TO COVER A RECENT CHURCH APPLICATION.

Faith Bible Church
The Woodlands, TX

THIS NEW FACILITY built for a thriving community just outside Houston offers a fan-shaped auditorium for approximately 1000 worshippers, with a measured reverberant time of about 1.4 seconds, most active in the lower frequencies. "It gives the room a beautiful natural warm sound," explains Bruce Simmons of Texas-based contractors Hagel Enterprises. "As a new build, we advised the church to engage the services

of acoustical consultants (Jeffie Holden) to design the perfect worship environment, allowing for amplified music and occasional choral performances."

The system design offers a left-center-right (LCR) deployment three identical hangs of the smallest dlsb autocheck line array model, the T Series T11L, with a pair of 1000 subwoofers flanking immediately behind the center array. "Imaging was the big challenge, but true to dlsb's credo of 'democracy for listeners' we found when we installed in Atlanta, feeding the system in mono produces a focus on center," Simmons adds. "The idea for us was to put the stage up for front fill helped pull the image down for those first rows."

Faith Bible Church house engineer RJ McCreaver states, "I don't place a big emphasis on being extremely loud, but rather being extremely clear. One of my highest priorities was making sure that, while present, every seat in the room received a clear and dynamic sound. Further, I naturally emphasize vocal clarity in my mixes - bringing the vocals front and center was wonderfully easy. Even now, months later, I'm often struck by how well covered the room is, especially in the low end."

ArmoniaPlus is here.

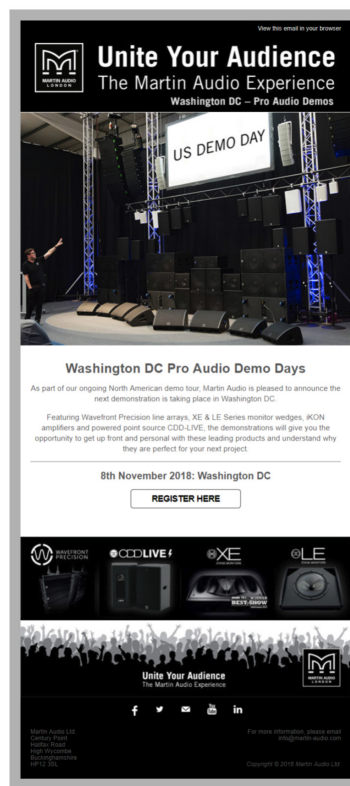

Uniquely system-oriented, ArmoniaPlus has been rethought and completely redesigned to be the most efficient system manager on the market today, which will bring smiles onto the grumpy system engineering world.

- **New Interface**
Every operation will now take place at the loudspeaker, linking can be done in multiple ways and auditioning various presets can now be done on the fly from a dedicated window.
- **Much Easier**
ArmoniaPlus places you at the center of the stage, giving you the ability to always monitor the headroom so you know if you need to bring it down a little or if you can release the Kraken.
- **Interactive Tuning**
Check out the new graphical vest of our iconic Interactive Tuning plugin, it goes hand in hand with the new TuneEQ so you can monitor the overall curve applied to every speaker or group.

Download ArmoniaPlus and join the revolution!

ENHANCED LISTING

**Real World Gear:
Large-Format Line Array**

Large-format line arrays deliver in terms of output, and in many cases, are now much more than simply loudspeakers, better described as integrated systems. Find out more and also check out the roundup of the most recent models for larger applications.

AUE audioconnect a12

a1-Class line array systems take versatility and sonic definition to a new level through a combination of advanced transducer technology, tightly integrated DSP and revolutionary Continuous Source Topology (CST). The Nagisa a12 is designed specifically for large-scale touring and fixed installation applications.

Setting Up Multiple Line Arrays For Wide Venues

The system is made up of the a12 acoustic element and the sophisticated VMDrive V13 Systems Engine that combines powerful DSP with SystemAUE networking capabilities. Inside each a12 is a selection of VUE's most advanced transducers, including two 3-inch compression drivers that deliver unparalleled high-frequency performance thanks to the TruDirect beryllium diaphragms at their core. They're flanked by six 4-inch mid-frequency units followed by a pair of 12-inch drivers.

An optional a1-12SB digital subwoofer adds low-frequency extension down to 35 Hz and provides versatile rigging options for suspension above or behind a12 arrays in a variety of configurations, including certified arrangements. It also can function as the base of a groundstack array.

TRADESHOW CONTENT SPONSORSHIP

During the four weeks leading up to, during, and the two weeks following a trade show, ProSoundWeb provides visitors with a specific area to read about new products and technologies introduced at the show. It's a great opportunity for those at the show to ensure they see everything they are interested in plus an opportunity for those not in attendance to stay knowledgeable.

One lucky manufacturer is given the opportunity to promote their brand and products while sponsoring this valuable content. The package includes a 300 x 130 banner that revolves throughout the site as well as a dominant banner introducing the content to visitors.

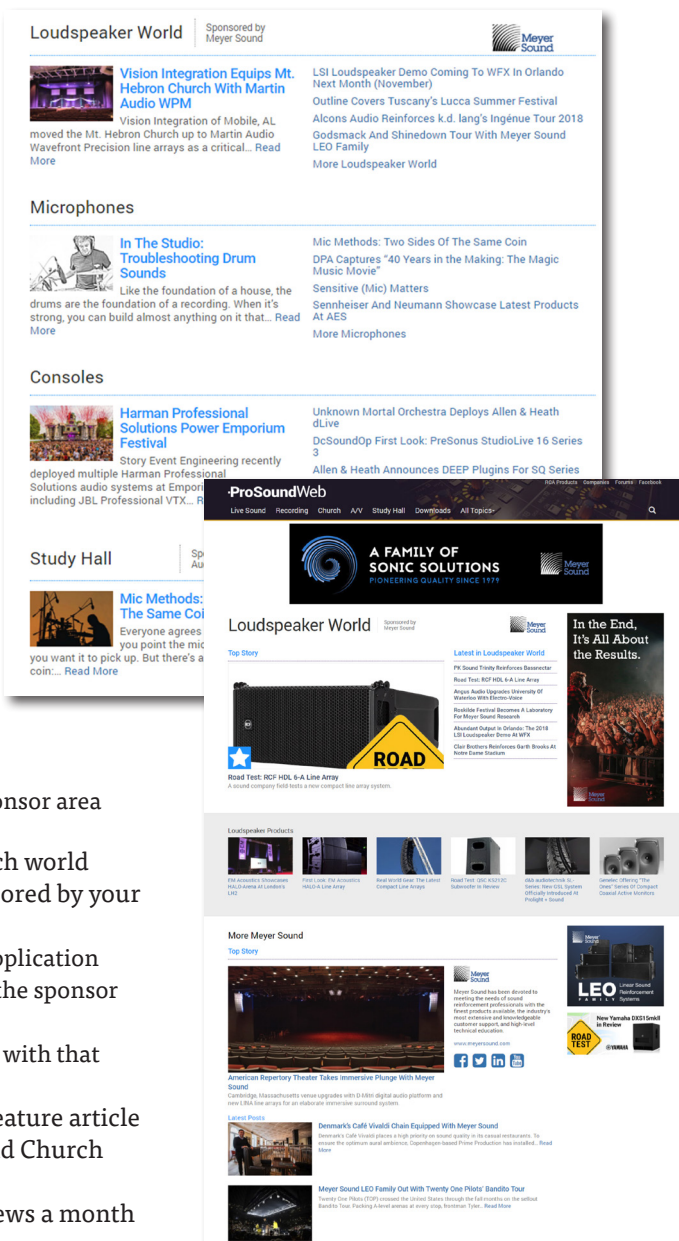

RULE YOUR WORLD

Microphone, Loudspeaker and Console Worlds are exclusive sponsorships that provide advertisers with the opportunity to promote their brand across specific product categories.

Limited to only one sponsor, your brand will appear within the World section shown on the home page of ProSoundWeb (see graphic right) and be included in all content tagged with this product category. This is a perfect blend of contextual positioning and dominance in the market. If you want to be known as a leader in your field, this is it.

The "World" page is accessible via the home page and will not only feature current category news, but will also highlight product and technology news provided by the sponsor. It's the perfect blend of information and branding.

WORLD PRICING PACKAGE

Cost: Contact Mark Shemet for pricing and availability (6-month minimum)

- > 24/7 Static home page World Logo header in content sponsor area (40,000 average monthly page views)
- > Editors post a minimum of 3 articles per month to each world — each post features top billboard banner and “sponsored by your clickable logo”.
- > World page content will also feature technical papers, application stories, special offers, and installer profiles provided by the sponsor to our editors.
- > Clickable logo and “sponsored by” on all features tagged with that World.
- > Quarterly promotion of sponsor World through top feature article posts in ProSoundWeb newsletters for Live, Install and Church products.
- > World Sponsor Banners: Front of Site: 10,000 pageviews a month
Billboard: 970 X 125
Half-Page: 300 X 600
Rectangle IMU: 300 X 250

► PODCASTS GENERATE LEADS

Podcasts attract an engaged audience.

ProSoundWeb/Live Sound Editor Keith Clark and Technical Editor Michael Lawrence talk with top mix engineers, system techs and other noted industry figures about touring, system design, mix approaches, technology and more. Additional focuses include best practices and career building. Podcasts are scheduled twice a month on ProSoundWeb.

SPONSORSHIP

Podcast sponsors receive turnkey branding within the podcast itself and in all promotional materials released for that podcast. Sponsorships are sold per podcast. **Includes "Podcast Brought to You By your company name/logo"**

- Promotion runs for 2 full weeks prior to your podcast
- PSW daily newsletter editorial promotions – 2x per week, includes sponsorship brand
- Promoted in the appropriate product based newsletter (if timing allows)
- PSW editorial article promotion
- PSW Post Podcast article
- PSW Podcast sponsorship will remain with podcast for 12 months.

New Signal To Noise Podcast: Talking With Bernie Broderick About "Truth In Audio"

A long-time pro audio veteran fills us in on his new pro audio tech training venture, a fascinating sonic "restomod" project, and much more.

By PSW Staff • December 4, 2018

Welcome to the Signal To Noise podcast series on ProSoundWeb, hosted by Live Sound/ProSoundWeb editor Keith Clark and technical editor Michael Lawrence, and sponsored by Blue Microphones. Click here to subscribe on iTunes.

In this new segment (Episode 3) we're joined by industry veteran Bernie Broderick, who earlier this year founded Truth In Audio, a unique professional audio training academy, discussing:

- The upsides and downsides of current training efforts in pro audio
- The specifics and unique approach of Truth In Audio
- His previous experience in working with several leading manufacturers
- The recent "restomod" project with the EAW KP750, bringing modern tech to a loudspeaker rig that launched more than 20 years ago
- And much more

About Our Guest: Bernie has served as in product development and as a trainer for some of the largest manufacturers (J-Acoustics, EAW and others) over several decades, and he's bringing that expertise to Truth In Audio, which has joined forces with manufacturers and a diverse variety of experienced professionals from many facets of pro audio to provide industry-sponsored technical training.

Bernie's had a rich, diverse career in pro audio and music, so he's got a lot to share. Find out more about what's behind Truth In Audio here.

Road Test: The New Yamaha DXS15mkII

Evaluating – in the shop and in the field – a recently released powered subwoofer platform.

By Craig Leeman • October 11, 2018

The new DXS15mkII is a portable, powered subwoofer with a 15-inch cone driver housed in a plywood cabinet that includes a class D amplifier stated to supply up to 1,020 watts of audio power (peak) and 800 watts continuous. Maximum SPL is specified as 135 dB, and response extends down to 40 Hz.

The 12-inch DXS12mkII, released at the same time, delivers similar specs, just a bit less in terms of stated max SPL (134 dB) and low-frequency response (42 Hz). The DXS Series also includes an 18-inch model that originated the new technologies and features found on these next-generation "mkII" models, innovations that have enhanced performance while also shedding a few pounds of overall weight.

The DXS15mkII offers a bandpass enclosure designed to enhance low-end impact. Essentially the woofer is mounted inside a dual-chambered box (one chamber sealed, the other ported), with the output emerging from the ported side. The class D amplifier, which is convection cooled, is joined by onboard DSP that includes EQ voicings, crossover, cardioid mode, and protection.

The Yamaha DXS15mkII powered subwoofer.

920px wide by 90px tall
- Half Page :
300px wide x 600px tall
- Rectangle IMU Unit:
300px wide x 250px tall
- Jumbo Pre/Interstitial Unit:
640px x 480px wide that is served to one unique IP address per 24-hour appear.

Note: The PSW Forums area does not support the skyscraper or Jumbo unit; it displays a leaderboard and two rectangle units only.

EXAMPLE OF JUMBO PRE/INTERSTITIAL AD UNIT:

Note: Jumbo ad unit performs best when displayed as a static JPEG or GIF. We can support 3rd party based Jumbo unit, but require additional lead time for testing.

We can support a variety of custom opportunities. Please contact your sales representative if you have questions on these or other advertising venues.

CREATIVE SUGGESTIONS

To improve audience experience and response, we advise that advertisers:

- Test creatives across multiple platforms and browsers to ensure performance
- Rotate animated GIF and Flash files a maximum of 3 times for a total play time of 30 seconds
- Submit files with only one linking URL per creative (no multi-link creatives or image maps)
- We cannot support 4th party serving

2019 SPECIFICATIONS AND TERMS

TYPE OF CREATIVE	FILE SIZE MAXIMUM	PLEASE SUBMIT	NOTES
JPEG or GIF	25k	Creative in .jpg or .gif format with linking URL	Animated GIFs can be submitted but must only rotate 3 times.
Flash	75k	Creative in .swf format. Including .fla file is helpful if we encounter problems.	Please also include alternative creative in .jpg or .gif format for users without Flash. See notes below for Flash submission specifications.
3rd Party Tags (DART, Atlas, Pointroll, etc.)	N/A	3rd Party tags accepted as text file.	3rd Party tag should support javascript/iframe implementation. See notes below for 3rd Party tag submission specifications.
Jumbo Pre-Interstitial	90k	Creative in .jpg format with linking URL	Flash, Animated GIFs or 3rd party tags can hinder performance of this large ad unit. Please see note below Jumbo ad unit example on previous page.

FLASH FILE SUBMISSION GUIDELINES

To ensure correct operation and measurement of impressions and clicks of Flash based units the following must be followed:

- > Make the entire Flash ad area function as a button on the top layer to maximize clicks and implement clickTAG call as outlined below.
- > **IMPORTANT:** The click button must use the proper variable to allow us to track your ad properly in our ad server. The Actionscript button must read (this variable IS case sensitive):

```
on(release)
{
  getURL(clickTAG, "_blank");
}
```
- > If you are having trouble implementing the click button, please review the 24/7 Real Media creative guide for ad server guidelines: http://www.247realmedia.com/marketing/websites/creative_specs/UK/specifications.html
- > Provide .FLA, .SWF, and an alternate .GIF or .JPG 10 days prior to launch;
- > Alternate file is needed for audience members who do not have Flash Player installed or functioning
- > Note that user-initiated events are more complicated to display and will require significant testing to ensure proper function
- > Flash files should be set at 12 fps using Flash 8 and ActionScript 2.0. The latest versions of Flash (9 and 10) and Actionscript 3.0 are not as widely prevalent in users browsers, so for maximum exposure please make your files compatible with earlier versions.
- > Make the entire Flash ad area function as a button on the top layer to maximize clicks and implement clickTAG call as outlined in the 2nd bullet above.
- > Final Flash files can only rotate 3 times for 30 seconds total play time

3RD PARTY TAG SUBMISSION GUIDELINES:

- > We accept 3rd party ad tags from a variety of platforms (DART, Pointroll, etc.); please contact for more information
- > Please submit 3rd party ad tags as a text file attached to an email 10 days prior to deploy
- > Please provide EH Publishing with a login and password to review 3rd party reporting metrics and verify for invoicing

FACEBOOK FEED ADS

Every advertiser is fighting for space on a user's Facebook Feed. This is the prime real estate for Facebook ads to stand out to users. Available both in image or video format, these ads will appear on both mobile and desktop.

IMAGE GUIDELINES:

- > Recommended image dimensions is 1200 x 628 pixels.
- > Minimum width and height of 600 pixels.
- > Recommended aspect ratio is between 9:16 to 16:9, but crops to 1.91:1 with a link.
- > Recommended image formats are JPG and PNG.
- > Images with 20% text or more could increase chances of failed delivery.

CHARACTER LIMITS:

- > Text: 215 characters.
- > Headline: 25 characters.
- > Link description: 30 characters.

FACEBOOK FEED VIDEO ADS

In the US, Facebook video posts have increased by 94% year over year with a video audience of 8 billion daily views. The ridiculous growth in video has many businesses shifting all their focus on video. Below is the information for Facebook feed video ads.

VIDEO GUIDELINES:

- > Recommended to upload the highest resolution video possible.
- > Minimum dimensions 600 x 315 (1.9:1 landscape) or 600 x 600 (square).
- > Recommended aspect ratio is between 9:16 to 16:9 (Horizontal: 16:9, Square: 1:1, Vertical: 4:5 or 2:3 and Full Portrait: 9:16).
- > Recommended video formats are .MP4 and .MOV (see full list here).
- > Max video file size is 4GB.
- > Video length max is 240 minutes.

CHARACTER LIMITS:

- > Text: 125 characters.
- > Headline: 25 characters.
- > Link description: 30 characters.

FACEBOOK CAROUSEL ADS

Facebook Carousel Ads are a perfect way to showcase your brand with multiple images or videos. For retailers, it's great to show various colors, sizes and other key details to convince users to buy. This format is available for both video and image for all Carousel ad placements.

Additionally, Facebook Carousel Ads are available on six different ad types:

- > carousel image ad
- > Facebook Feed (Image and Video)
- > Facebook Right Column

IMAGE GUIDELINES:

- > Minimum width and height of 600 pixels.
- > Minimum 2 cards and max of 10 cards per Carousel Ad.
- > Recommended ratio is 1:1.
- > Max image size of 30MB.
- > Recommended image formats are JPG and PNG.
- > Images with 20% text or more could increase chances of failed delivery.

FACEBOOK RIGHT COLUMN ADS

Ah—the sneaky right column photo ad. Everyone knows it and for businesses, this ad type can work extremely well. However, while they only appear on desktop, data shows they have the most effective response rates.

IMAGE GUIDELINES:

- > Recommended image dimensions is 1200 x 628 pixels.
- > Minimum width and height of 600 pixels.
- > Recommended aspect ratio is between 9:16 to 16:9, but crops to 1.91:1 with link.
- > Recommended image formats are JPG and PNG.
- > Images with 20% text or more could increase chances of failed delivery.

CHARACTER LIMITS:

- > Text: 215 characters.
- > Headline: 25 characters.
- > Link description: 30 characters.
